► Culture test performed using human iPS cells

Methods

Human iPS cells (201B7; Takahashi, K. et al., *Cell*, 131, 861-72, 2007) were cultured in the Primate ES cell medium with MEF feeder cells for 4 days.

After 3 passages, the cell morphology were observed.

Alkaline phosphatase activity was ascertained using the ALP substrate kit III (vector).

Results

Alkaline phosphatase activity: Qualified
