

Cat#: RCHEOT001 Lot: A01RF21

For Research Use Only

Expiry date 3 years from the date of manufacture

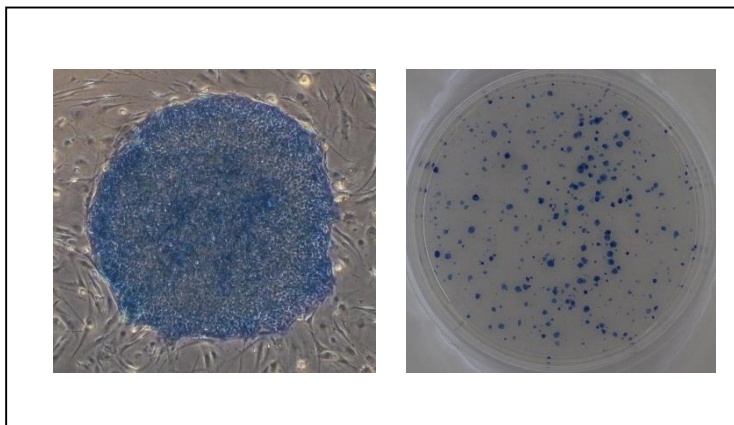

► Culture test performed using human iPS cells

Methods

Human iPS cells (201B7; Takahashi, K. et al., *Cell*, 131, 861-72, 2007) were cultured in the Primate ES Cell Medium containing 5 ng/mL of bFGF for more than 4 days. Subsequently, the cell morphology was observed and compared with those of the control. Alkaline phosphatase activity was ascertained using the ALP substrate kit III (vector).

Results

Alkaline phosphatase activity: Qualified
